## Improve existing UI

This week take some time to revisit the design and improve existing implementation of the UI.

## Add unit tests for ERC20 smart contract

Research writing unit tests for smart contracts using truffle framework. Goal is to create test cases for all public methods of the ERC20 smart contract.

Good place to start is by reading official docs on testing  
<https://www.trufflesuite.com/docs/truffle/testing/writing-tests-in-javascript>.

---

Good luck!
